Why Plant Native Plant Species?

A native plant species is one that occurs naturally in a particular region, ecosystem, and/or habitat. The plants offered in this brochure are indigenous to Winnebago and surrounding counties. They evolved over thousands of years to survive in our weather extremes and local soils, in harmony with other native flora and fauna. Once established, native species require only occasional maintenance—no fertilizers, no pesticides or herbicides, and minimal watering (after they have become established).

The native birds, butterflies, bees, and mammals that evolved with native plants depend on them for food and shelter. Native plants also serve as host plants for new generations of beneficial butterflies and insects. Non-native plants usually do not meet these needs. Even cultivars of native plants, which are bred to please humans, often lose their ability to sustain wildlife; the resulting decrease in genetic diversity impairs their ability to adapt for future survival.

This sale is ideal for those new to landscaping with native plants as well as experienced native plant gardeners. Most of the species offered here are easy to grow and will provide years of beauty while helping the environment. We recommend incorporating natives into your existing flower beds—mixed right in with other perennials. Or, create new beds of native plant species for a greater environmental impact.

How to Choose Your Plants

In order for native plant species to survive, it is important to match the plant requirements with your site's features. Some species have very specific requirements, while others can adapt to a wider range of environments. Water and light requirements can vary; young plants may need more attention to watering and encroaching plants than those that are mature.

In a naturalistic setting, having a diversity of species will provide a full range of color and bloom times. Even in a smaller setting, careful choices will result in the continuous color and harmony considered desirable in both natural and traditional landscapes. Planting three or more of the same species in one area allows for drifts of color, texture, and interest throughout the seasons and helps to attract more pollinators.

We highly recommend that you choose plants that will best thrive in your soil, moisture, and sunlight conditions. The information in this brochure lists the best soil conditions and sun exposure for each species (although some species can survive in a wide range of environments). See the "Growing Conditions Guide" in this brochure.

Growing Conditions Guide

Use this guide to help you select the plant species that best match the conditions where they will be planted.

RANGE OF SUN EXPOSURE

Shade (SH)	Varies from light shade to dense shade with little or no direct sun.
Part Shade (PS)	Some direct sun. Less intense early morning or late afternoon sun.
Full Sun (S)	Six hours or more of unfiltered sun.

RANGE OF SOIL MOISTURE

Dry (D)	Excessively drained. Usually sandy or gravelly soil.
Dry Mesic (DM)	Medium dry. Well-drained but retains some moisture.
Mesic (M)	Medium moist. Average garden soil.
Wet Mesic (WM)	Medium moist to soggy most of the year.
Wet (W)	Soggy or marshy most of the year.

If you are ordering <i>Nymphaea odorata</i> (American White Water Lily), you must call Jane Evans (815.494.7731) by March 31. Pickup for this plant will be late June/early July		

Become a Plant Sale Volunteer!

Come join us as a volunteer at our 2023 native plant sale.

Volunteer shifts range from about two to four hours in the morning or afternoon on days before and during the sale. Select just one spot or sign-up for more. It's a fun way to get outside, visit with fellow Wild Ones members, and meet others interested in native plants. You'll also have the opportunity to shop for native plants!

Contact Cynthia Nelson at cnelson18@niu.edu or 815.758.8978 if you are interested in helping with the plant sale this year. We'd love to have you join us!

Volunteers at the plant sale

Janet Giesen RRVC Chapter WO

Did You Know?

- ***Antennaria plantaginifolia*** (Pussytoes #3) is a host plant for the American Lady butterfly. Since this butterfly tends to lay eggs heavily once they find these plants, please plant plenty.
- ***Hydrophyllum virginianum*** (Virginia Waterleaf #26) provides early pollen for queen bumblebees searching to provide for a new colony.
- ***Schizachyrium scoparium*** (Little Bluestem #44) is a host plant for several skipper butterflies.
- ***Scrophularia marilandica*** (Late Figwort #45) carries a rich abundance of nectar in the tiniest of flowers which attracts hummingbirds, myriad bees, and other insects. The stems also provide a winter home for insects; leave standing over winter.
- ***Viola pedatifida*** (Prairie Violet #54), once common on prairies, is a host plant for fritillary butterflies. Plant in spots where they won't be stepped on.
- Birds rely on berries and caterpillars to feed their young. Native dogwoods, viburnums, and serviceberries provide berries and are host plants for caterpillars which are eaten by robins, cardinals, catbirds, and other birds. Think tree and shrub sale!
- Planting native plants instead of non-native grass will help create beneficial habitat across the country.
- Wild Ones will also be selling plants at Nicholas Conservatory on Mother's Day and the Klehm Garden Fair June 3 and 4.

Fall Tree and Shrub Sale

Like native wildflowers, grasses, and sedges, native trees and shrubs thrive without much human intervention. They provide habitat for birds, butterflies, pollinators, and other wildlife. Trees clean the air we breathe, keep us cooler in the summer, and lessen the negative effects of heavy rainfalls. Additionally, native trees and shrubs add value to your property.

The tree and shrub sale will take place in early fall and the brochure will be available in print and online late summer. For further information about this sale, contact our tree and shrub coordinator, Brian Hale at treeandshrubsale@gmail.com

Chapter members will receive an electronic version of the tree and shrub sale brochure automatically when they become available. Non-members can request to be put on the [mailing list](#) to receive the free brochure.

Placing Your Order, Potential Crop Failure, and Plant Availability

Plants in this brochure were selected at the end of 2022 based on vendor inventory and projected expectations for the new year. Weather and other growing conditions can affect the availability of plants.

Choice of plant substitution or refund will be available only in the event of shortages. Native plant species not listed in this brochure will also be available for substitution and sale at the pickup location.

IMPORTANT: Order early as supplies are limited! Orders will be filled in the order in which they are received. Orders placed late may not be filled due to the limited number of plants.

Plant Health

We make every effort to ensure the plants that you receive are healthy at the time of pickup. Wild Ones Rock River Valley Chapter cannot guarantee plant materials after they leave our possession. New plants, especially plugs, should be planted and watered soon after purchase. Some plants may need extra care, as well as protection from wildlife, until they have become established.

About Rock River Valley WO Chapter

Wild Ones is a national not-for-profit organization with over 60 chapters and advocates for the many benefits of growing native plants in home and other landscapes. To stay on top of events and news in the native plant community, members receive the Wild Ones Journal, a bimonthly national magazine, as well as our chapter newsletter. New memberships also include the New Member Wild Ones Handbook, a great resource for native gardeners. Household membership is \$40 a year and is tax deductible.

The Rock River Valley Chapter is the second largest and one of most active Wild Ones' chapters, with over 175 members. Our monthly programs, featuring speakers expert in their field, are open to the public. Certain special programs, events, and services are members-only benefits. For more information about joining, contact our membership chair at worrvmembership@gmail.com. You can also visit our chapter website at www.WildOnesRRVC.org. Snap the QR code with your smart phone to access the chapter's website to learn more about meetings and events, read newsletters, and find links to informative references.

Native Plant Sales—An Important Part of the Wild Ones Mission

The Wild Ones Rock River Valley Chapter holds two plant sales each year: the Native Plant Sale and the Tree and Shrub Sale. These sales make available a great selection of native plants that are seldom found at garden centers and big box stores. The proceeds fund educational activities including our excellent monthly educational programs. Please visit the website www.WildOnesRRVC.org to learn more about Wild Ones and the meetings to which everyone is cordially invited.

Creating Your Own Native Garden

The following points are from the Wild Ones publication, *Creating Your Own Native Garden: A Guide to Creating Beautiful Home Landscapes*, available at <https://nativegardendesigns.wildones.org>

1. **Study your site** taking note of sun, shade, soil type, drainage and soil moisture.
2. **Map out your space.** Mark all existing plants currently on your site.
3. **Study your neighborhood** and consider what design elements would look great in your community.
4. **Research designs you love.** Get inspiration from other garden designs specific to your region.
5. **Design with the right plant** in the right place.
6. **Leave enough room for plants** to reach their mature size.
7. **Create a focal point** to draw your eye through your garden.
8. **Add water features** like birdbaths or small fountains to add interest and attract wildlife to your landscape.
9. **Group plants together** for visual impact. Plant in groups of odd numbers with a minimum of three of each species. In each area, choose 3 to 5 species in broad drifts that repeat throughout the planting area.
10. **Use a mixture of textures** with fine, bolder foliage, and tall fine-textured grasses as a frame behind lower rounded perennials.
11. **Keep plants in scale.** Maximum plant height should be half the width of your bed.
12. **Choose plants to ensure blooms** and foliage provide interest in all seasons.
13. **Give your planting bed a clean edge** to serve as a frame that accents your planting.
14. **Consider your budget.** Review the time and money you have available for installation and maintenance.

Extra Native Plants

Subject to availability, we will have the following plants at the plant sale on May 11, 12, 13. Refer to the Native Plant Resources and Growing Conditions Guide in this brochure for information on light, moisture, and other features for these plants.

NOTE: These plants cannot be pre-ordered; shop the in-person plant sale early for best selection. *Pollinator host plant

Botanical Name	Common Name
<i>Adiantum pedatum</i>	Maidenhair Fern
<i>Anemone canadensis</i>	Canadian Anemone
<i>Aquilegia canadensis</i> *	Wild Columbine
<i>Arisaema triphyllum</i>	Jack-in-the-Pulpit
<i>Asarum canadense</i> *	Wild Ginger
<i>Asclepias incarnata</i> *	Rose Milkweed
<i>Asclepias sullivantii</i> *	Prairie Milkweed
<i>Asclepias verticillata</i> *	Whorled Milkweed
<i>Baptisia bracteata</i> *	Cream Indigo
<i>Blephilia ciliata</i>	Downy Wood Mint
<i>Caltha palustris</i>	Marsh Marigold
<i>Carex sprengei</i> *	Long-beaked Sedge
<i>Caulophyllum thalictroides</i> *	Blue Cohosh
<i>Ceanothus americanus</i> *	New Jersey Tea
<i>Dryopteris marginalis</i>	Marginal Shield Fern
<i>Echinacea purpurea</i> *	Purple Coneflower
<i>Eryngium yuccifolium</i> *	Rattlesnake Master
<i>Erythronium albidum</i>	White Trout Lily
<i>Eutrochium purpureum</i> *	Sweet Joe-Pye-Weed

Botanical Name	Common Name
<i>Filipendula rubra</i>	Queen of the Prairie
<i>Geranium maculatum</i> *	Wild Geranium
<i>Heliopsis helianthoides</i> *	Ox-Eye Sunflower
<i>Heuchera richardsonii</i>	Prairie Alumroot
<i>Iris cristata</i> *	Dwarf-crested Iris
<i>Liatris pycnostachya</i> *	Prairie Blazingstar
<i>Monarda bradburiana</i> *	Eastern Beebalm
<i>Monarda fistulosa</i> *	Wild Bergamot
<i>Polystichum acrostichoides</i>	Christmas Fern
<i>Ratibida pinnata</i> *	Yellow Coneflower
<i>Rudbeckia fulgida</i> *	Showy Black-eyed Susan
<i>Ruellia humilis</i> *	Wild Petunia
<i>Sanguinaria canadensis</i> *	Bloodroot
<i>Silene stellata</i> *	Starry Campion
<i>Solidago speciosa</i> *	Showy Goldenrod
<i>Tiarella cordifolia</i>	Foam Flower
<i>Trillium grandiflorum</i> *	Large White Trillium
<i>Uvularia grandiflora</i>	Bellwort
<i>Viola pedata</i> *	Birdfoot Violet
